ACADMIC YEAR 2026-27

EXECUTIVE SUMMARY

This report presents a financial analysis of Tata Motors for the period FY2021 to FY2025. The analysis examines key financial indicators including revenue, EBITDA, EBIT, PROFIT AFTER TAX, TOTAL ASSETS, TOTAL DEBT, SHAREHOLDERS' EQUITY, AND EPS. Financial ratios and growth measures have also been calculated to understand changes in profitability, operational performance, financial position, and shareholder returns over the five-year period. The analysis has been prepared using Microsoft Excel based on consolidated financial data reported by Tata Motors.

Scope of analysis

The analysis covers five financial years from FY2021 to FY2025. It focuses on revenue and profitability trends, financial position, leverage efficiency and selected shareholder-related indicators. The calculations and visualizations were prepared in Microsoft Excel to facilitate comparison across the five-year period.

Company overview

ABOUT TATA MOTORS

Tata MOTORS IS A Major Indian automobile manufacturer and a part of Tata Group. The company operates across passenger vehicles, commercial vehicles, and related automotive businesses, with operations in India and international markets. Its automotive portfolio includes vehicles across multiple segments and brands .

Purpose of the analysis

The purpose of this analysis is to examine Tata Motors financial performance and financial position over a five-year period from FY2021 to FY2025. The report uses key financial indicators and calculated ratios to identify changes in revenue, profitability, assets, debt, equity and earnings per share.

Data sources

The financial information used in this project is based on Tata Motors published annual reports and consolidated financial disclosures for the relevant financial years. The data was organized and analyzed using Microsoft Excel.

Financial data and methodology

Financial data used

The analysis used consolidated financial data of Tata Motors covering FY2021 to FY2025. The key financial indicators considered in the analysis are Revenue, EBITDA, EBIT, PROFIT AFTER TAX, TOTAL ASSETS, TOTAL DEBT, SHAREHOLDERS' EQUITY, AND EPS.

ANALYTICAL APPROACH

THE FINANCIAL DATA was organized in Microsoft Excel and analyzed using year-on year growth rates, profitability margins, returns ratios, leverage ratios, and efficiency ratios. Charts were also created to visually represent major financial trends and facilitate comparison across the five-year period.

Key calculations

- Revenue growth%
- EBITDA MARGIN%
- EBIT MARGIN%
- PAT MARGIN%
- RETURN ON ASSETS
- RETURN ON EQUITY
- DEBT TO EQUITY
- EPS GROWTH %
- ASSET TURNOVER RATIO
- DEBT TO EBITDA RATIO

FINANCIAL DATA - FY2021 to FY2025

PARTICULAR	FY2021	FY2022	FY2023	FY2024	FY2025
REVNUE	249735	278454	345967	434016	439695
EBITDA	30397	26721	34796	62800	57600
EBIT	6471	1949	17304	36000	34700
PROFIT AFTER TAX	-13395.10	-11411	2690	31807	28149
TOTAL ASSETS	343125	330620	365725	370664	378642
TOTAL DEBT	135905	139677	130354	109937	62499
SHAREHOLDERS EQUITY	56820	44832	68273	93094	122754
EPS	-39.06	-4.54	6.29	81.95	78.80

NOTE : Financial figures are presented in rupees cr. Unless otherwise stated. EPS is presented in rupee per share .

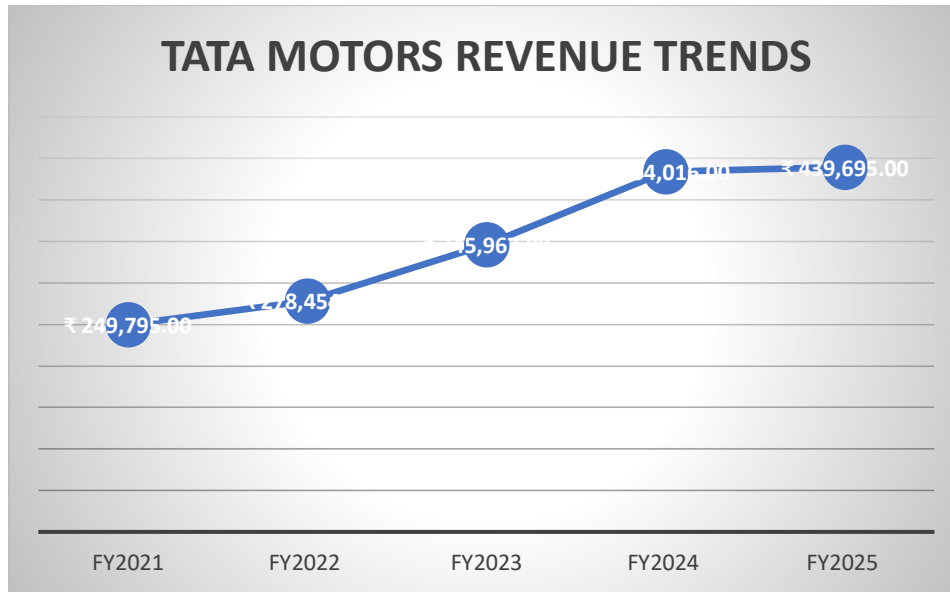

FIG.1 TATA MOTORS TREND ANALYSIS

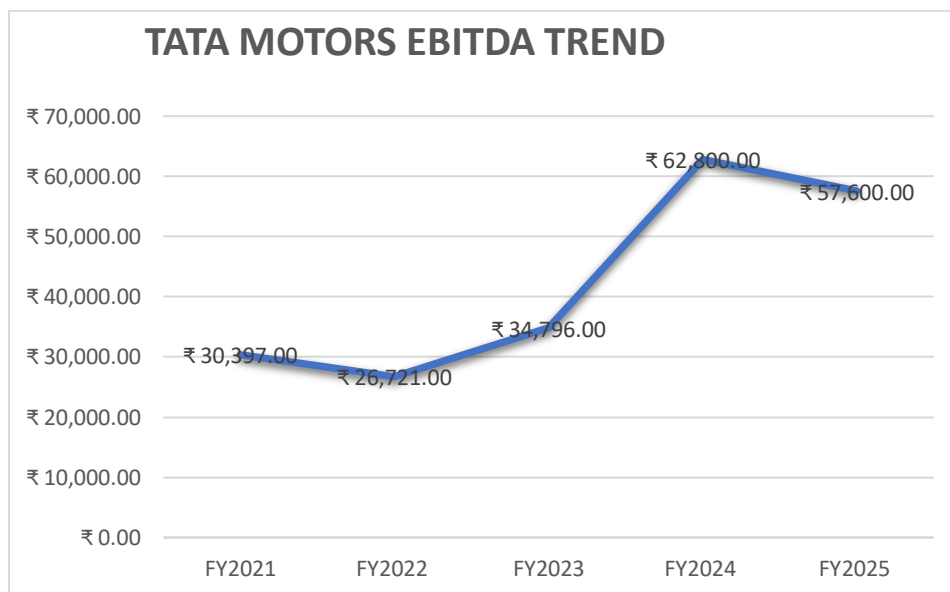

FIG. TATA MOTORS EBITDA TREND ANALYSIS

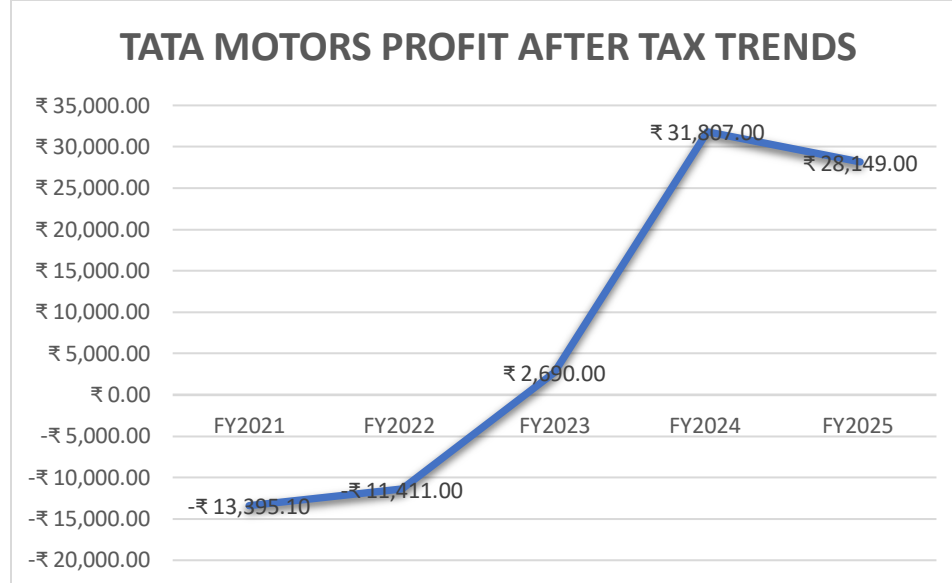

FIG.3 TATA MOTORS PAT TREND ANALYSIS

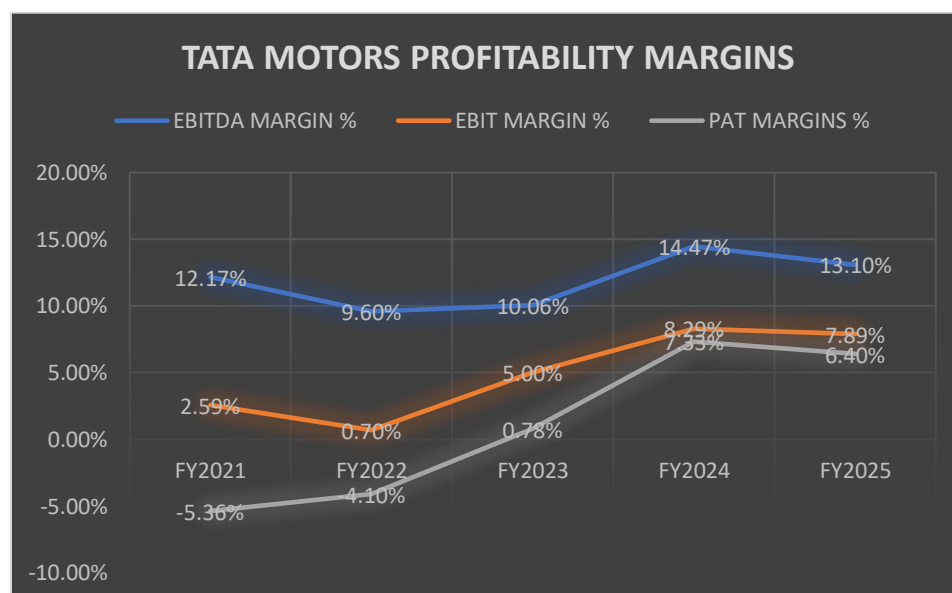

FIG. 4 TATA MOTORS PROFITABILITY MARGIN ANALYSIS

Revenue performance

Revenue performance is analyzed over the five year period to understand the overall growth trajectory of Tata Motors operations.

Profitability performance

EBITDA, EBIT, AND PROFIT after tax are analyzed to assess changes in operation profitability and overall earnings during the period. Profitability margins provide additional insight by relating these measures to revenue .

Financial position

Total assets, total debt, and shareholders equity are examined to understand changes in the company's asset base, capital structure and financial position.

Shareholders indicators

EPS is considered as a shareholder related indicator to examine changes in earnings attributable to each ordinary share over the analysis period.

Revenue Trend

Revenue is examined across FY2021–FY2025 to identify the overall direction and changes in the company's operating scale during the period.

Trend analysis

EBITDA Trend

EBITDA is analyzed to assess changes in operating profitability before interest, tax, depreciation, and amortization. The trend helps evaluate the movement in the company's operating performance over the five-year period.

Profit After Tax Trend

Profit After Tax (PAT) is analyzed to understand changes in the company's final earnings after accounting for relevant expenses, interest, tax, and other applicable items.

Profitability Margins

EBITDA margin, EBIT margin, and PAT margin are compared across the five-year period to assess profitability relative to revenue. These margins help provide a standardized view of financial performance across different years.

Results and findings

1.Revenue Performance

The revenue trend indicates how Tata Motors' operating scale changed over the five-year period. The year-wise comparison helps identify periods of stronger growth and periods of relatively slower growth.

2. Operating Profitability

EBITDA and EBIT trends provide an indication of changes in operating profitability. Comparing these measures with revenue helps assess whether profitability improved alongside the company's operating scale.

3. Net Profitability

The PAT trend highlights changes in the company's overall earnings during the period. Comparing PAT with revenue through the PAT margin provides additional perspective on changes in net profitability.

4. Financial Position and Leverage

Changes in total assets, debt, and shareholders' equity provide insight into the company's financial position and capital structure. The debt-to-equity and debt-to-EBITDA ratios further help assess changes in financial leverage.

KEY INSIGHTS

1. Strong Revenue Growth

Tata Motors recorded a substantial increase in consolidated revenue over FY2021–FY2025. Revenue increased from ₹249,795 crore in FY2021 to ₹439,695 crore in FY2025, indicating significant expansion in the company's overall business scale.

2.Improvement in Operating Profitability

EBITDA margin improved from 12.17% in FY2021 to 13.10% in FY2025, while EBIT margin increased from 2.59% to 7.89% over the same period. The improvement indicates stronger operating profitability compared with the earlier years.

3. Significant Recovery in Net Profitability

Tata Motors reported negative PAT margins in FY2021 and FY2022. Profitability subsequently improved, with PAT margin reaching 7.33% in FY2024 and remaining positive at 6.40% in FY2025.

4. Improvement in Financial Leverage

The Debt-to-Equity ratio declined from approximately 2.39x in FY2021 to approximately 0.51x in FY2025, based on the debt and equity figures used in this analysis. This indicates a substantial reduction in debt relative to equity during the five-year period.

5. Shareholder Performance

EPS improved from a negative figure in FY2021 to ₹78.80 per share in FY2025. EPS reached ₹81.95 in FY2024 before declining moderately in FY2025, while remaining substantially above the levels recorded during the earlier years.

CONCLUSION

The five-year financial analysis of Tata Motors for FY2021–FY2025 indicates a significant improvement in the company's overall financial performance. Revenue increased substantially during the period, while operating profitability improved through higher EBITDA and EBIT

margins. After reporting losses in FY2021 and FY2022, the company returned to positive net profitability from FY2023 onwards.

The analysis also shows an improvement in the company's financial position, with the Debt-to-Equity ratio declining considerably over the period. Shareholder indicators also improved, as reflected in the recovery of EPS from negative levels to ₹78.80 per share in FY2025.

Overall, the analysis highlights the changes in Tata Motors' revenue, profitability, leverage and shareholder-related indicators over the five-year period. The findings are based on consolidated financial data and calculated financial ratios presented in the accompanying Excel workbook

LIMITATIONS AND NOTES

This analysis is based on consolidated financial information of Tata Motors for FY2021–FY2025 obtained from the company's published financial reports and related disclosures. The analysis focuses on selected financial indicators and ratios and therefore does not represent a complete valuation or comprehensive assessment of the company.

Financial figures are presented in ₹ crore, unless otherwise stated.

EPS is presented in ₹ per share.

Financial ratios have been calculated using the figures presented in the analysis.

Differences may occur between calculated figures and reported figures due to rounding and differences in financial-reporting presentation.

Debt and equity figures are based on the definitions used consistently in this analysis.

The analysis is intended for academic and educational purposes and should not be considered an investment recommendation.

The accompanying Excel workbook contains the underlying data, calculations, charts, and dashboard used for this analysis.
